

Header Data

Released On	26.02.2013 10:10:50
Release Status	Released for Customer
Component	BC-FES-GXT GuiXT
Other Components	BC-FES-GUI Graphical User Interface
Priority	Recommendations / Additional Info
Category	Installation information

Symptom

This note describes the maintenance strategy for GuiXT.

Other Terms

GuiXT; personalization; synactive; personas; support; lifetime

Reason and Prerequisites

GuiXT is a product developed, supported and marketed by the company Synactive GmbH (<http://www.synactive.com>). The GuiXT runtime is shipped as part of the SAP GUI for Windows installation by SAP.

In 2012 SAP published a product called "SAP Screen Personas" which offers functionality in an area related to those areas covered by GuiXT.

Solution

SAP does not intend to:

- Stop the shipment of the GuiXT runtime as part of the SAP GUI for Windows installation.
- Deactivate GuiXT or harm GuiXT functionality.

Synactive will:

- Continue to provide support for GuiXT via the SAP support infrastructure.
- Continue to implement enhancements in GuiXT.

This support and delivery strategy ensures that investments by Synactive's and SAP's customers into GuiXT and thereby personalization of SAP Screens are protected and that existing functionality can continue to be used.

Validity

This document is not restricted to a software component or software component version
